	Task	Description
1	Landmark Face	Our API analyzes all the features of a face and zoom into sections like the eyes, nose, and lips to have any possibility of doing reliable emotion detection or head pose estimation through Facial Landmark Points. The Face Landmark API maps the detected faces on a 128-point vector scale which can be used for performing the task of detecting key landmarks on the face and tracking them. API can detect landmarks of all the faces detected in a picture and use them further in various purposes like face swapping, face averaging, etc.
